CONTACT INFORMATION	Queens' College, University of Cambridge Silver Street, Cambridge, CB3 9ET, UK	Email: cl.herresthal Webpage: www.cher	
EMPLOYMENT	UNIVERSITY OF CAMBRIDGE Junior Research Fellow in Economics		2016 - 2019
EDUCATION	University of Oxford DPhil in Economics supervised by Dr Margaret Meyer		
	University of Oxford MPhil in Economics		2010 - 2012
	University of Bristol BSc Economics and Mathematics		2007 - 2010
RESEARCH FIELDS	Microeconomic Theory, Game Theory, Public Economics, Economics of Education		
Working Papers	"Hidden Testing and Selective Disclosure of Evidence" - Job Market Paper "Performance-Based Rankings and School Quality" - R&R Economic Journal		
ACADEMIC	Royal Economics Society Junior Fellowship, Royal Economic Society		2015 - 2016
Awards	Chellgren Scholarship, University College, University of Oxford		2012 - 2015
	Departmental Funded Studentship, University of Oxford		2012 - 2015
	Additional Paper Prize, Warsaw International Economics Meeting		2014
TEACHING AND SUPERVISING EXPERIENCE	BA thesis "The Impact of the 2012 Tuition Fee Reform on UK Students"		2016 - 2019
	BA POLITICS, PHILOSOPHY, ECONOMICS, UNIVERSITY Introductory Microeconomics (1st year) Elementary Mathematical Methods (1st year) Intermediate Microeconomics (2nd year)	TY OF OXFORD	2012 - 2016
Invited Talks	Toulouse School of Economics, University of Arizona		2018
	Bocconi Workshop on Experimentation; Birkbeck Univ	versity of London	2017
	University of Cologne		2016
	University of Edinburgh; University of Bonn		2015
	University of Cambridge		2014

FURTHER TALKS AND CONFERENCE	EEA Annual Congress; International Game Theory Conference, Stony Brook; Economic Design Conference, York		2017	
Presentations	Royal Economic Society Annual Conference 2			
	Econometric Society Winter Meeting; Econometric Society World Congress; 2018 GESS Mannheim Summer School			
	CE2 workshop Microeconomics; Public Economics UK Conference; Warsaw International Economics Meeting; CIREQ Matching Conference; York Symposium on Game Theory		2014	
Professional Service	,			
	Scientific Committee: RES Symposium for Junior Researchers 2017			
	Organizer: Economics Department DPhil and Postdoc Workshop 2		014 - 2015	
VISITS AND SHORT-TERM EMPLOYMENT	Bonn Graduate School of Economics Visitor Ap		April 2015	
	Research Assistant; Centre for Market and Public Organisation, Bristol 8 weeks; empirical work using Stata; Pisa data			
	Undergraduate Admissions Interviewer, Oxford and Cambridge		012 - 2017	
LANGUAGES	English (fluent), German (native), French (basic), Portugese (basic)

Working Paper	Hidden Testing and Selective Disclosure of Evidence (Job Market Paper)			
Abstracts	I consider a game with two players, a decision maker and an advisor, who are uncertain			
	about the state of the world. The advisor can sequentially run informative tests and			

disclose (some or all) of the outcomes to the decision maker. The decision maker then faces a binary choice. Players agree on the optimal choice under certainty, but their

preferences are misaligned under uncertainty in that players differ in how they trade off losses from wrong choices. I characterize equilibria of this game. In particular, I compare the case where testing is hidden and the advisor can choose which test outcomes to verifiably disclose to the case where testing is observable. I show that the decision maker is weakly better off when testing is hidden rather than observable if players' preferences are sufficiently misaligned. Otherwise, hidden testing can leave the decision maker strictly worse off. I identify conditions on preference parameters under which both players can be strictly better off when testing is hidden rather than observable.

Performance-Based Rankings and School Quality (R&R Economic Journal)

I study students' inferences about school quality from performance-based rankings in a dynamic setting. Schools differ in location and unobserved quality, students differ in location and ability. Short-lived students observe a school ranking as a signal about schools' relative quality, but this signal also depends on the ability of schools' past intakes. Students apply to schools, trading off expected quality against proximity. Oversubscribed schools select applicants based on an admission rule. In steady-state equilibrium, I find that rankings are more informative if more able applicants are given priority in admissions or if students care less about distance to school.
