EMPLOYMENT	University of Bonn Postdoctoral Researcher		2019 -
	University of Cambridge Junior Research Fellow in Economics		2016 - 2019
EDUCATION	UNIVERSITY OF OXFORD DPhil in Economics supervised by Dr. Margare		2012 - 2017
	University of Oxford MPhil in Economics		2010 - 2012
	University of Bristol BSc Economics and Mathematics		2007 - 2010
RESEARCH FIELDS	Microeconomic Theory, Game Theory, Informat	ion Theory	
Working Papers	"Performance-Based Rankings and School Quality" - Accepted at Economic Journal "Hidden Testing and Selective Disclosure of Evidence" - Revise and Resubmit at Journal of Economic Theory		
Academic	Royal Economics Society Junior Fellowship, Royal	val Economic Society	2015 - 2016
Awards	Chellgren Scholarship, University College, University	ersity of Oxford	2012 - 2015
	Departmental Funded Studentship, University of	f Oxford	2012 - 2015
	Additional Paper Prize, Warsaw International E	conomics Meeting	2014
SUPERVISION	BSc Economics, University of Bonn Seminars on Strategic Communication (19/20) a	and Consumer Privacy (20)	2019-
	BA ECONOMICS, UNIVERSITY OF CAMBRIDGE BA thesis "The Impact of the 2012 Tuition Fee Microeconomic Principles and Problems (3rd ye		2016-2019
	BA POLITICS PHILOSOPHY ECONOMICS, UNIV Introductory Microeconomics (1st year) Elementary Mathematical Methods (1st year) Intermediate Microeconomics (2nd year)	ersity of Oxford	2012-2016

Invited Talks	BI Norwegian Business School, Oslo; University of Munster		2019	
	Toulouse School of Economics; University of Arizona			
	Bocconi Workshop on Experimentation; Birkbeck University of London			
	University of Cologne			
	University of Edinburgh; University of Bonn			
	University of Cambridge		2014	
FURTHER TALKS AND CONFERENCE PRESENTATIONS	Southern Economic Association Meeting, Miami			
	Econometric Society Winter Meeting, Naples			
	EEA Annual Congress; International Game Theory Conference, Stony Brook; 2017 Economic Design Conference, York			
	Royal Economic Society Annual Conference			
	Econometric Society Winter Meeting; Econometric Society World Congress; GESS Mannheim Summer School		2015	
	CE2 workshop Microeconomics; Public Economics UK Conference; Warsaw International Economics Meeting; CIREQ Matching Conference; York Symposium on Game Theory			
Professional Service	Refereeing: Economic Journal, Journal of Economic Theory, Econometrica, Games and Economic Behavior, Journal of the European Economic Association, European Economic Review			
	Scientific Committee: RES Symposium for Junior Researchers		2017	
	Organizer: Economics Department DPhil and Postdoc Workshop 20		2014-2015

WORKING PAPER ABSTRACTS

Performance-Based Rankings and School Quality

Accepted at Economic Journal

I study students' inferences about school quality from performance-based rankings in a dynamic setting. Schools differ in location and unobserved quality, students differ in location and ability. Short-lived students observe a school ranking as a signal about schools' relative quality, but this signal also depends on the ability of schools' past intakes. Students apply to schools, trading off expected quality against proximity. Oversubscribed schools select applicants based on an admission rule. In steady-state equilibrium, I find that rankings are more informative if more able applicants are given priority in admissions or if students care less about distance to school.

Hidden Testing and Selective Disclosure of Evidence

Revise and Resubmit at Journal of Economic Theory

An agent can sequentially run informative tests about an unknown state and disclose (some or all) outcomes to a decision maker who then faces an approval choice. Players agree on the optimal choice under certainty, but the decision maker has a higher approval threshold than the agent. I compare the case where testing is hidden and the agent chooses which test outcomes to verifiably disclose to the case where testing is observable. When testing is observable, I show that the agent may strategically stop testing even if further tests could yield a mutual benefit. I find conditions under which the decision maker is strictly better off under hidden testing and in some equilibria both players are strictly better off under hidden testing than in the unique equilibrium under observable testing.
